Faculty of Information Technology CTU in Prague

- Most Ukrainian students are currently registered at FIT
- We are glad, however:
 - Because we have only 1 programme, all students must complete a common theoretical foundation, formed mainly of Maths and theoretical Computer Science.
 - Students may be surprised because they expected more practical or applied Informatics
 - Informatics is also taught at other CTU Faculties
 - Read the websites of all Faculties, all programmes and specializations
 - I wish you the right decision and good luck
